

Welcome to 3dCWA.com.

-----a site to introduce you about our lenticular products

Nowadays, advertisement is everywhere, whatever how beautiful is your ad, it is difficult to attract people's eyes, because all the outside ad image is plane. All the flat advertisement look same and no difference, it is easy to make your own ad board be neglected.

When lenticular image Advertisement comes to the market, which is attracting our eyes for their unfamiliar transform image, it likes the oasis in the advertisement effect.

The solid 3D image has distinct layers and transformed scene, people can see different scene from different point of view, and it feels so real and give you strong visual impact. The solid 3D image technology can change the featureless photo to the transformable and visual shock impact image, which bring people new experience.

Let us know your ideas, we can help you to make it become true!
